Production date of the KID : 26.02.2024

Warning: You are about to purchase a Product that is not simple and may be difficult to understand.

### WHAT IS THIS PRODUCT ?

#### Type

This Product is a compartment of AXIOM LUX, an open-ended umbrella Fund, organized as an investment company with limited liability and with variable capital (a "SICAV") under Luxembourg law.

#### Term

The Product has an investment horizon of at least 3 years.

#### Objectives

The investment objective of the Product is to achieve, over a minimum 3-year investment horizon, a return net of management fees equal to or greater than that of its benchmark, the BofA Contingent Capital Index (with coupons reinvested), through investments that meet Environmental, Social and Governance (ESG) criteria. The Product seeks to improve the consideration of climate aspects through the use of the Axiom Climate Readiness Score (ACRS), which enables investments in financial institutions leaders in the integration of climate change considerations. The management company has full discretion over the composition of the portfolio of the Product and may take exposure to companies, countries or sectors not included in the Benchmark, even though the Benchmark constituents may be representative of the Product's portfolio.

The Product is Actively Managed and references the BofA Contingent Capital Index for comparative purposes only. Its investment policy is to select bonds or debt securities issued by financial institutions. The use of subordinated bonds, especially "Additional Tier 1" bonds, will be at the core of the investment process.

Bonds and other debt securities are part of the "financial subordinated debt" category, which is considered more speculative and has a greater risk of default, in exchange for higher yields. A debt is considered "subordinated" if it can only be paid after the claims of other creditors have been met (preferred creditors, unsecured creditors). Therefore, a subordinated creditor will be repaid after ordinary creditors and before shareholders.

The acquisition or disposal of bonds or debt securities is based on an in-house analysis of each issuer's credit risk. The Product may be fully invested in debt securities of any credit quality, with a High Yield rating - securities considered highly speculative - from the main rating agencies or a rating considered equivalent by the management company.

The Product may hedge against credit risk through the use of CDS (Credit Default Swaps) or expose its cash component to the credit market through the use of such instruments.

The Product is constantly exposed to the interest rate markets of OECD countries, especially those of EU countries, the U.K., Switzerland and the U.S. Exposure to each of these markets may be as high as 100%. Exposure to non-OECD markets is incidental (below 10%).

Since part of the assets may be denominated in currencies other than the base currency, the Product will be systematically hedged against this risk. However, a residual risk remains. Management is fully discretionary. Arbitrage operations can be executed depending on market conditions and opportunities. The Product is managed within a 0 to 10 sensitivity scale. The Product adopts has the sustainable investment objective of climate mitigation within the meaning of article 9 of SFDR and has adopted binding ESG restrictions to attain that objective.

ESG integration is carried out through a proprietary approach, which includes : Monitoring and management of an investment exclusion list based on reckless social behavior on consumer protection and business ethics, as well as poor governance;

Selecting financial institutions based on their Axiom Climate Readiness Score (ACRS), using a straightforward best in class approach;

Managing the exposures and investment weights of the portfolio based on the risk appetite of the Product, the management company's risk management tools (Stress testing, Axiom Risk Grade, ESG screening) and relative value analysis.

Selecting financial institutions based on their Axiom Climate Readiness Score (ACRS) and excluding those that do not meet the minimum thresholds. The ACRS is a proprietary methodology developed to identify best-in-class firms addressing the challenges that climate change and the energy transition pose to their core business;

Excluding banks which activities contribute to a temperature rise of more than 3°C.

For more information, please refer to the management company's ESG and exclusion policies available at : <https://axiom-ai.com/web/en/regulatory-information/>.

#### Intended Retail Investor

Sophisticated investors

#### Practical information

Depository : CACEIS Bank, Luxembourg Branch

## WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN ?

### Risk Indicator

1	2	3	4	5	6	7
---	---	---	---	---	---	---

←----->  
lower rewards higher rewards

The summary risk indicator assumes you keep the Product until maturity end of the recommended holding period (3 years).

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

Significant risk(s) for the Product not taken into account in this indicator include the following:

- **Credit risk:** Investors are exposed to the risk of defaults on the bonds included in the portfolio. This risk may affect up to 100% of the portfolio. The materialisation of this risk may lead to a fall in the Product's net asset value.
- **Counterparty risk:** The Product may suffer losses as a result of a counterparty failing to meet its contractual obligations.
- **Liquidity risk:** Liquidity risk exists when particular investments are difficult to purchase or sell. This can reduce the Product's returns because the Product may be unable to transact at advantageous times or prices. This can be the result of shocks of unprecedented intensity and severity such as but not limited to pandemics and natural disasters.

For more information on risks, please refer to the prospectus of the Product.

This Product does not include any protection from future market performance so you could lose some or all of your investment.

### Performance Scenarios

The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this Product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate and favourable, scenarios presented represent examples using the best and worst performances, as well as the average performance of the Product and/or the appropriate benchmark indicator over the last 10 years.

Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

#### Investment EUR 10,000

The recommended holding period is 3 years.		If you exit after 1 year	If you exit after 3 years (recommended holding period)
<b>Scenarios</b>			
<b>Minimum</b>	There is no minimum guaranteed return. You could lose some or all of your investment.		
<b>Stress scenario</b>	What you might get back after costs	EUR 2,590	EUR 4,340
	Average return each year	-74.1%	-24.3%
<b>Unfavourable scenario</b>	What you might get back after costs	EUR 8,260	EUR 9,270
	Average return each year	-17.4%	-2.5%
<b>Moderate scenario</b>	What you might get back after costs	EUR 10,000	EUR 11,170
	Average return each year	0.0%	3.8%
<b>Favourable scenario</b>	What you might get back after costs	EUR 12,420	EUR 14,010
	Average return each year	24.2%	11.9%

This table shows the money you could get back over the recommended holding period of 3 years, under the different scenarios, assuming you invest EUR 10,000.

Unfavourable scenario : this scenario occurred for an investment between 09/2019 and 09/2022.

Moderate scenario : this scenario occurred for an investment between 08/2015 and 08/2018.

Favourable scenario : this scenario occurred for an investment between 04/2014 and 04/2017.

## WHAT HAPPENS IF AXIOM ALTERNATIVE INVESTMENTS IS UNABLE TO PAY OUT ?

The Product's ability to pay out would not be affected by the insolvency of the manufacturer. You may however face a financial loss should the Depositary default on its obligations. Such default risk is limited as the Depositary is required by law and regulation to segregate its own assets from the assets of the Product. There is no compensation or guarantee scheme in place which may offset, all or any of, these potential losses.

## WHAT ARE THE COSTS ?

The person advising on or selling this Product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the Product performs as shown in the moderate scenario
- EUR 10 000 per year is invested

Investment EUR 10,000	If you exit after 1 year	If you exit after 3 year (recommended holding period)
<b>Total costs</b>	EUR 524	EUR 898
<b>Annual cost impact (*)</b>	5.2%	2.7% each year

(\*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 6.47% before costs and 3.76% after costs.

### Composition of Costs

Investment EUR 10,000 and annual cost impact if you exit after 1 year

One-off costs		If you exit after 1 year
Entry costs	This includes distribution costs of 2.00% of the invested amount. This is the most you will be charged. The person selling you the Product will inform you of the actual charge.	EUR 200
Exit costs	This includes distribution costs of 2.00% of the invested amount. This is the most you will be charged. The person selling you the Product will inform you of the actual charge.	EUR 200
Ongoing costs (taken each year)		
Management fees and other administrative or operating costs	0.95% of the value of your investment per year. This figure is based on actual costs over the past year.	EUR 95
Transaction costs	0.29% of the value of your investment per year. This is an estimate of the costs incurred when we buy or sell the underlying investments for the Product. The actual amount will vary depending on how much we buy and sell.	EUR 29
Incidental costs taken under specific conditions		
Performance fees and carried interest	No performance fee currently applicable.	EUR 0

The table below shows the impact of the different types of costs on the investment return you might get at the end of the recommended holding period and what the different cost categories mean.

## HOW LONG SHOULD I HOLD IT AND CAN I TAKE THE MONEY OUT EARLY ?

### Recommended holding period : 3 years

This Product is designed for longer term investments ; you should be prepared to stay invested for at least three years.

Share subscription and redemption orders can be placed at any time and are centralised no later than noon on every valuation day and executed daily.

## HOW CAN I COMPLAIN ?

Pursuant to Article 313-8 of the AMF general regulation, information on the complaint handling procedure is made available free of charge by Axiom Alternative Investments.

Axiom has implemented and maintains an operational procedure to quickly and efficiently process complaints made by its clients. Any complaint may be sent to the Compliance department by post to Axiom Alternative Investments, 39 avenue Pierre 1er de Serbie 75008 Paris, France. The management company will acknowledge receipt of the complaint within ten working days of the date on which it was received, unless a response has been issued to the client in the intervening period. Except in duly justified exceptional circumstances, a response will be issued to the client within two months of receipt of the complaint.

For France: In the event of an ongoing dispute, the client may contact a mediator, such as the AMF Ombudsman. The address of the AMF Ombudsman is: Autorité des marchés financiers, The AMF Ombudsman, 17 place de la Bourse, 75082 PARIS CEDEX 02, FRANCE. The AMF mediation request form and the Mediation Charter are available online at <http://www.amf-france.org>.

For Luxembourg: In the event of a dispute or in the absence of an acknowledgment of receipt or response within one month of the complaint being made, the client may contact the competent authority, either by post to Commission de Surveillance du Secteur Financier, L-2991 Luxembourg or by email to [direction@cssf.lu](mailto:direction@cssf.lu).

The CSSF dispute resolution request form and relevant texts on the matter are available at <http://www.cssf.lu>.
