AXIOM LONG SHORT CREDIT A Compartment of AXIOM LUX

Share Class: P (EUR), ISIN code: LU2177671059
This SICAV is managed by Axiom Alternative Investments

Objectives and investment policy

The main characteristics of the Fund are:

- The investment objective of the Compartment is to seek to achieve attractive risk-adjusted returns over time.
- The Fund is actively managed and references several indices as described in the prospectus (the “**Benchmarks**”) as part of its investment process. As part of the investment process, the management company has full discretion over the composition of the Fund’s portfolio and may take exposure to companies, countries or sectors not included in the Benchmarks.
- The Fund seeks to achieve the investment objective by taking long and short positions primarily in European & North American fixed income securities. Equity securities may be also considered although with a limit of 20% of the net asset value of the Fund long exposure.
- The Fund will gain direct and indirect exposure to fixed income securities issued by corporate and government issuers and equities which are listed or traded on a Recognised Market. The Fund will not be restricted to any industry or sector.
- The fixed income securities to which the Fund will gain exposure may be fixed or floating rate, and have a rating of investment grade, or sub-investment grade, as rated by a Recognised Rating Agency or may be unrated, may pay a coupon in cash, in securities, either in cash or new securities, may be zero-coupon bonds, may be convertible bonds. The Fund may expose up to 100% of its Net Asset Value in non-investment grade fixed income securities. Government securities may be issued by both OECD and non-OECD member states.

- The Fund may invest through index derivatives, which give broad market or sector exposure, and may use a range of other derivatives, such as total return swaps, options, futures, credit default swaps or contracts for difference, to invest indirectly in specific fixed income or equity investments. Derivatives may also be used for hedging purposes.
- It is expected that by using derivatives, the Fund’s long positions will typically be up to 125% of the net asset value of the Fund and short positions up to 100% at any given time.
- The Fund may also invest in open-ended exchange traded funds (“ETFs”) and open-ended collective investment schemes (“CIS”) which provide exposure to securities that are consistent with the investment policy of the Fund within the general limit on investment in CIS.

Others information:

- The recommended investment horizon is at least three years.
- The UCITS reinvests its income.
- Share subscription and redemption orders can be placed at any time and are centralised no later than noon on every valuation day and executed daily.

Risk and reward profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- This indicator represents the annual historical volatility of the Fund over a 5-year period.
- This Fund is classified in category 2 because of its management strategy which consists of investing in the international bond market and in particular in perpetual fixed coupon bonds.
- Historical data such as that used to calculate the synthetic indicator cannot be considered as a reliable indication of the Fund’s future risk profile.
- The risk category associated with the Fund is not guaranteed and may change over time.
- The lowest risk category does not mean “risk free”.
- Your initial investment is not guaranteed.

Significant risk(s) for the Fund not taken into account in this indicator include the following:

- **Credit risk:** Investors are exposed to the risk of defaults on the bonds included in the portfolio. This risk may affect up to 100% of the portfolio. The materialisation of this risk may lead to a fall in the Fund’s net asset value.
- **Counterparty risk:** The Fund may be exposed to the counterparty risk from the use of financial forwards entered into in the OTC market with a credit institution. Therefore, the Fund is exposed to the risk of default from these financial institutions on payment obligations related to such operations.
- **Liquidity risk:** Liquidity risk exists when particular investments are difficult to purchase or sell. This can reduce the Fund’s returns because the Fund may be unable to transact at advantageous times or prices. This can be the result of shocks of unprecedented intensity and severity such as but not limited to pandemics and natural disasters.

For more information on risks, please refer to the prospectus of the Funds.
