- This indicator represents the annual historical volatility of the Fund over a 5-year period.
- This Fund is classified in category 3 because of its management strategy which consists of investing in the international bond market and in particular in perpetual fixed coupon bonds.
- Historical data such as that used to calculate the synthetic indicator cannot be considered as a reliable indication of the Fund's future risk profile.
- The risk category associated with the Fund is not guaranteed and may change over time.
- The lowest risk category does not mean "risk free".
- Your initial investment is not guaranteed.

Significant risk(s) for the Fund not taken into account in this indicator include the following:

- Credit risk:** Investors are exposed to the risk of defaults on the bonds included in the portfolio. This risk may affect up to 100% of the portfolio. The materialisation of this risk may lead to a fall in the Fund's net asset value.
- Counterparty risk:** The Fund may be exposed to the counterparty risk from the use of financial forwards entered into in the OTC market with a credit institution. Therefore, the Fund is exposed to the risk of default from these financial institutions on payment obligations related to such operations.
- Liquidity risk:** Liquidity risk exists when particular investments are difficult to purchase or sell. This can reduce the Fund's returns because the Fund may be unable to transact at advantageous times or prices. This can be the result of shocks of unprecedented intensity and severity such as but not limited to pandemics and natural disasters.
