Production date of the KID : 01.01.2023

Caution : You are about to purchase a Product that is not simple and may be difficult to understand.

### WHAT IS THIS PRODUCT ?

#### Type

This Product is a compartment of AXIOM LUX, an open-ended umbrella Fund, organized as an investment company with limited liability and with variable capital (a "SICAV") under Luxembourg law.

#### Term

The Product has an investment horizon of at least 3 years.

#### Objectives

The investment objective of the Product is to achieve, over a minimum 3-year investment horizon, a return net of management fees equal to or greater than that of its benchmark, the BofA Contingent Capital Index (with coupons reinvested), through investments that meet Environmental, Social and Governance (ESG) criteria. The Product seeks to improve the consideration of climate aspects through the use of the Axiom Climate Readiness Score (ACRS), which enables investments in financial institutions leaders in the integration of climate change considerations. The management company has full discretion over the composition of the portfolio of the Product and may take exposure to companies, countries or sectors not included in the Benchmark, even though the Benchmark constituents may be representative of the Product's portfolio.

The Product is Actively Managed and references the BofA Contingent Capital Index for comparative purposes only. Its investment policy is to select bonds or debt securities issued by financial institutions. The use of subordinated bonds, especially "Additional Tier 1" bonds, will be at the core of the investment process.

Bonds and other debt securities are part of the "financial subordinated debt" category, which is considered more speculative and has a greater risk of default, in exchange for higher yields. A debt is considered "subordinated" if it can only be paid after the claims of other creditors have been met (preferred creditors, unsecured creditors). Therefore, a subordinated creditor will be repaid after ordinary creditors and before shareholders.

The acquisition or disposal of bonds or debt securities is based on an in-house analysis of each issuer's credit risk. The Product may be fully invested in debt securities of any credit quality, with a High Yield rating - securities considered highly speculative - from the main rating agencies or a rating considered equivalent by the management company.

The Product may hedge against credit risk through the use of CDS (Credit Default Swaps) or expose its cash component to the credit market through the use of such instruments.

The Product is constantly exposed to the interest rate markets of OECD countries, especially those of EU countries, the U.K., Switzerland and the U.S. Exposure to each of these markets may be as high as 100%. Exposure to non-OECD markets is incidental (below 10%).

Since part of the assets may be denominated in currencies other than the base currency, the Product will be systematically hedged against this risk. However, a residual risk remains. Management is fully discretionary. Arbitrage operations can be executed depending on market conditions and opportunities. The Product is managed within a 0 to 10 sensitivity scale. The Product adopts the sustainable investment objective of climate mitigation within the meaning of article 9 of SFDR and has adopted binding ESG restrictions to attain that objective.

ESG integration is carried out through a proprietary approach, which includes : Monitoring and management of an investment exclusion list based on reckless social behavior on consumer protection and business ethics, as well as poor governance;

Selecting financial institutions based on their Axiom Climate Readiness Score (ACRS), using a straightforward best in class approach;

Managing the exposures and investment weights of the portfolio based on the risk appetite of the Product, the management company's risk management tools (Stress testing, Axiom Risk Grade, ESG screening) and relative value analysis.

Selecting financial institutions based on their Axiom Climate Readiness Score (ACRS) and excluding those that do not meet the minimum thresholds. The ACRS is a proprietary methodology developed to identify best-in-class firms addressing the challenges that climate change and the energy transition pose to their core business;

Excluding banks which activities contribute to a temperature rise of more than 3°C.

For more information, please refer to the management company's ESG and exclusion policies available at : <https://axiom-ai.com/web/en/regulatory-information/>.

#### Intended Retail Investor

Sophisticated investors

#### Practical information

Depository : CACEIS Bank, Luxembourg Branch

## WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN ?

### Risk Indicator

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The risk indicator assumes you keep the Product until maturity end of the recommended holding period.

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The figures do not take into account your personal tax situation, which may also affect how much you get back. The summary risk indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets or because we are not able to pay you.

The level 3 risk and reward indicator reflects the Product's overall exposure to interest-rate markets through high yield, speculative securities, which offer high yields in compensation for a higher risk of default.

Significant risk(s) for the Product not taken into account in this indicator include the following:

- **Credit risk:** Investors are exposed to the risk of defaults on the bonds included in the portfolio. This risk may affect up to 100% of the portfolio. The materialisation of this risk may lead to a fall in the Product's net asset value.
- **Counterparty risk:** The Product may suffer losses as a result of a counterparty failing to meet its contractual obligations.
- **Liquidity risk:** Liquidity risk exists when particular investments are difficult to purchase or sell. This can reduce the Product's returns because the Product may be unable to transact at advantageous times or prices. This can be the result of shocks of unprecedented intensity and severity such as but not limited to pandemics and natural disasters.

For more information on risks, please refer to the prospectus of the Product.

### Performance Scenarios

The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this Product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

#### Investment EUR 10,000

Scenarios		If you exit after 1 year	If you exit after 3 years (recommended holding period)
Stress scenario	What you might get back after costs	EUR 8,260	EUR 7,640
	Average return each year	-17.4%	-8.6%
Unfavourable scenario	What you might get back after costs	EUR 8,260	EUR 8,860
	Average return each year	-17.4%	-4.0%
Moderate scenario	What you might get back after costs	EUR 10,130	EUR 11,470
	Average return each year	1.3%	4.7%
Favourable scenario	What you might get back after costs	EUR 12,420	EUR 14,010
	Average return each year	24.2%	11.9%

This table shows the money you could get back over the recommended holding period under different scenarios, assuming that you invest EUR 10,000.

## WHAT HAPPENS IF THE MANUFACTURER IS UNABLE TO PAY OUT ?

You may face a financial loss should the Manufacturer or the Product's depository prove to be unable to pay you out. There is no compensation or guarantee scheme in place which may offset, all or any of, this loss.

## WHAT ARE THE COSTS ?

### Costs over time

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the Product itself, for the different holding periods. They include potential early exit penalties. The figures assume you are invest EUR 10,000. The figures are estimates and may change in the future.

The person advising on or selling you this Product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Investment EUR 10,000	If you exit after 1 year	If you exit after 3 year (recommended holding period)
Total costs	EUR 550	EUR 1,050
Impact on return (RIY) per year	5.5%	3.1%

### Composition of Costs

Investment EUR 10,000 and annual cost impact if you exit after 1 year

One-off costs	Entry costs	The impact of the costs you pay when entering your investment. This is the maximum you will pay and you could pay less.	2.00%	EUR 200
	Exit costs	The impact of the costs of exiting your investment when it matures. This is the maximum you will pay and you could pay less.	2.00%	EUR 200
	Conversion fees	If applicable. Please refer to the conversion sections of the prospectus for applicable situations and conditions.	none	EUR 0
Recurring costs (taken each year)	Management fees and other administrative or operating costs	The impact of the costs that we take each year for managing this Product.	1.00%	EUR 100
	Portfolio transaction costs	The impact of the costs of us buying and selling underlying investments for this Product.	0.58%	EUR 58
Incidental costs	Performance fees	No performance fee currently applicable.	none	EUR 0

This table shows the impact the different costs have on the investment return you might get back at the recommended holding period and the meaning of the different cost categories.

## HOW LONG SHOULD I HOLD IT AND CAN I TAKE THE MONEY OUT EARLY ?

### Recommended holding period : 3 years

This Product is designed for longer term investments ; you should be prepared to stay invested for at least three years.

Share subscription and redemption orders can be placed at any time and are centralised no later than noon on every valuation day and executed daily.

## HOW CAN I COMPLAIN ?

Pursuant to Article 313-8 of the AMF general regulation, information on the complaint handling procedure is made available free of charge by Axiom Alternative Investments.

Axiom has implemented and maintains an operational procedure to quickly and efficiently process complaints made by its clients. Any complaint may be sent to the Compliance department by post to Axiom Alternative Investments, 39 avenue Pierre 1er de Serbie 75008 Paris, France. The management company will acknowledge receipt of the complaint within ten working days of the date on which it was received, unless a response has been issued to the client in the intervening period. Except in duly justified exceptional circumstances, a response will be issued to the client within two months of receipt of the complaint.

For France: In the event of an ongoing dispute, the client may contact a mediator, such as the AMF Ombudsman. The address of the AMF Ombudsman is: Autorité des marchés financiers, The AMF Ombudsman, 17 place de la Bourse, 75082 PARIS CEDEX 02, FRANCE. The AMF mediation request form and the Mediation Charter are available online at <http://www.amf-france.org>.

For Luxembourg: In the event of a dispute or in the absence of an acknowledgment of receipt or response within one month of the complaint being made, the client may contact the competent authority, either by post to Commission de Surveillance du Secteur Financier, L-2991 Luxembourg or by email to [direction@cssf.lu](mailto:direction@cssf.lu).

The CSSF dispute resolution request form and relevant texts on the matter are available at <http://www.cssf.lu>.
