This UCITS is classified in category 3 because of its management strategy which consists of investing in the international bond market and in particular in perpetual fixed coupon bonds.

- The historical data used to calculate the risk level might not be a reliable indicator of this Compartment's future risk profile.
- The lowest category does not mean "risk-free".
- The risk category for this Compartment is not guaranteed to remain unchanged and may shift over time.
- The UCITS does not offer the investor any capital protection.

Risks materially relevant to the UCITS which are not adequately captured by the indicator:

Credit risk: investors are exposed to the risk of defaults on the bonds included in the portfolio. This risk may affect up to 100% of the portfolio. The materialisation of this risk may lead to a fall in the Compartment's net asset value.

Counterparty risk: the Compartment may be exposed to the counterparty risk from the use of financial forwards entered into in the OTC market with a credit institution. Therefore, the Compartment is exposed to the risk of default from these financial institutions on payment obligations related to such operations.

Liquidity risk: risk arising from the difficulty or impossibility of selling securities held in the portfolio when needed and at the portfolio's valuation price, due to the limited size of the market or insufficient trading volumes in the market where these securities are usually traded.

For more information on risks, please refer to the prospectus of the UCITS.
