

## UC AXIOM GLOBAL COCO BONDS UCITS ETF

ISIN: LU1873136862

CCNU GY Equity

### INVESTMENT OBJECTIVE

The objective of **UC AXIOM GLOBAL COCO BONDS UCITS ETF** is to track the performance of the **Solactive AXIOM Liquid Contingent Capital Global Market TR Index – EUR hedged**. The fund aims to provide a quick access to the broad CoCo bonds market.

Additional Tier 1 or Restricted Tier 1 instruments are junior subordinated debt securities issued by financial institutions and are included in capital ratios. They can be converted into equity or have their principal partially or completely written off if the issuer's capital ratio falls below a specific contractual trigger.

### INDEX DESCRIPTION

SOLAXICC is designed to **provide exposure to the performance of the most liquid EUR and USD denominated Additional Tier 1 and Restricted Tier 1** bonds issued by global financial institutions. The Index constituents weights are determined **according to the total market value outstanding of each constituent. The bond issuers are rated Investment Grade** on senior unsecured debt, by at least one of the three major rating agencies.

### OPPORTUNITIES

- Providing investors access to the **entire liquid global CoCo bond market (AT1 & RT1 bonds)**.
- First global CoCo bond ETF to **provide a currency hedged market weighted exposure**.
- The index only includes bonds from issuers with an **investment grade rating (senior unsecured)**.
- CoCo bonds offer an **attractive yield and a low modified duration**.
- Physically replicated and **UCITS compliant**.

### RISKS & OTHER NOTICES

- No guarantee that the ETF will track the index correctly.
- No capital protection: In the event of resolution, default or deterioration in the quality of the issuers, the value of the bonds in which the fund is invested will fall.
- Extension risk: The possibility of redemption date not taking place as expected. The maturity date initially proposed may be exceeded.
- Interest rate risk: Investors are exposed to interest rate risk. Interest rate risk is the risk that bond market interest rates may rise, which would cause bond prices to fall.
- Coupon Risk: This is the possibility that the coupon is not paid (outside any resolution situation). The non-payment of a coupon can be definitive as is at the discretion of the issuer.

**Index disclaimer**

Solactive AG ("Solactive") is the licensor of Solactive AXIOM Liquid Contingent Capital Global Market TR Index – EUR hedged. (the "Index"). The financial instruments that are based on the Index are not sponsored, endorsed, promoted or sold by Solactive in any way and Solactive makes no express or implied representation, guarantee or assurance with regard to: (a) the advisability in investing in the financial instruments; (b) the quality, accuracy and/or completeness of the Index; and/or (c) the results obtained or to be obtained by any person or entity from the use of the Index. Solactive shall not be liable for any damages suffered or incurred as a result of the use (or inability to use) of the Index. All information, including index levels, provided for any date or time period prior to the launch date of the index is back-tested. Back-tested performance is not actual performance, but is hypothetical. The back-test calculations are based on the same or fundamentally the same methodology that was in effect when the index was launched. A back-test calculation means that no actual investment which allowed a tracking of the performance of the Index was possible at any time during the period of the back-test calculation and that as a result any comparison is purely hypothetical. The methodology and the model used for the calculation and back-test calculation of the Index were developed with the advantage of hindsight. In reality, it is not possible to invest with the advantage of hindsight and therefore this performance comparison is purely theoretical.
