### MONTHLY COMMENT AS AT 31/05/2022

#### Market commentary

Inflation was a major theme in the markets during the month of May, as investors vacillated between record price increases and diminished but resilient growth. This hesitation had a downward impact on the markets in the first half of the month before they partially recovered in the second half. This volatility is likely to persist as long as the magnitude, speed and duration of the ongoing monetary tightening remain uncertain.

Against this backdrop, risk appetite strengthened slightly at the end of the month with the SubFin index tightening by 5 basis points to 185. In the equity market, the energy and banking sectors outperformed, while the retail and media sectors underperformed.

The outlook for banks' earnings is encouraging:

- Consensus EPS expectations for 2023 and 2024 are now back at their highest year-to-date, erasing the Ukraine-Russia war losses.
- Net income interest expectations should continue to climb as analysts update their models with the latest rate market levels.
- Nominal cost trends are likely to be slightly worse than expected, though C/I ratios should be better than expected.

Moreover, the resolve of the ECB in its fight against inflation is questionable, privileging economic growth. The shift in rate hikes expectations, though spectacular, has lagged increases in forward inflation markets - and is very far off from changes in realized core inflation. As such, we believe talks of a recession induced by higher rates in the Eurozone to be premature.

This renewed optimism reopened the primary market with two AT1 issues (Skandinaviska Enskilda Banken and Julius Bär) and a T2 from Athora. These issues were largely oversubscribed, indicating significant liquidity in the market.

# **Fund activity**

Regarding the Fixed-to-Fixed, the fund held more than 3% on each of the Legacy Helaba bonds, whose call wes confirmed on June 30, in line with our expected scenario.

As for the Long Calls, the fund held a marginal 0.13% holding on the Barclays 6.86 after lightening up when the make-whole price had fallen below the market prices.

Finally, the fund held 2.5% in Legacy Athora at the time of the tender announcement and was able to add beyond 3% at a price below the tender. It will retain half of its exposure until the next call, now certain.

In this high spread environment, we remain fully invested by strengthening our positions in the following buckets: Discos, Long Calls, Improving Credits, and especially Legacy AT1s which offer spreads between 370 and 570 for calls under two years.

#### PRINCIPAL RISKS

Significant risk(s) for the Fund not taken into account in the SRRI indicator include the following:

**Credit risk:** Investors are exposed to the risk of defaults on the bonds included in the portfolio. This risk may affect up to 100% of the portfolio. The materialisation of this risk may lead to a fall in the Fund's net asset value.

Counterparty risk: The Fund may suffer losses as a result of a counterparty failing to meet its contractual obligations.

**Liquidity risk:** Liquidity risk may materialise where specific and exceptional market conditions make finding market counterparties or reasonable prices difficult.

**Use of derivative financial instruments:** Equally, the use of derivatives may increase or decrease the volatility of the Fund by increasing or decreasing its exposure, respectively. In the event of adverse market developments, the net asset value may fall. For more information on risks, please refer to the prospectus of the Funds.
